## Inogen Releases External Battery Charger as New Accessory Product

SANTA BARBARA, CA – Inogen released the External Battery Charger for sale June 1st, 2005. The External Battery Charger allows Inogen One users to conveniently charge additional batteries outside the concentrator.

Prior to the External Battery Charger, Inogen One users recharged their batteries in the Inogen One when connected to AC or DC power sources. The External Battery Charger offers increased convenience for Inogen One users who have more than one battery.

“The External Battery Charger is a demonstration of Inogen’s promise to offer increased independence and spontaneity to oxygen users,” says Inogen CEO, Kathy Odell. “Furthermore, the External Battery Charger increases convenience for users who have more than one battery.”

Indeed, many Inogen One users obtain an additional Inogen One Battery to extend their independence. The External Battery Charger has been requested by a number of current Inogen One users who have multiple batteries and is a natural fit for active oxygen users. The External Battery Charger is one of several accessories offered by Inogen for use with the Inogen One.

*Inogen is innovation in oxygen therapy. With a team of known leaders in the provider industry, deep experience in medical devices, talented engineers and associates each committed to revolutionizing oxygen therapy, our vision is to develop innovative, cost effective respiratory home healthcare equipment that improves quality of life for patients and bottom line profits for providers. And we are proud to introduce our first commitment to that vision: The Inogen One.*

*One Solution: The single solution for home and away, for today and tomorrow, for patients and provider.*
