Inogen to Present at Wall Street Conference, Harris Nesbitt's Fourth Annual Healthcare Event

Company to Highlight its Opportunity to Garner Market Share and Grow Revenues
Rapidly with its Innovative Single Solution for Oxygen Patients

Santa Barbara, Calif., December 8, 2005 – Inogen, Inc. today announced that it will participate in a Wall Street institutional investor event sponsored by investment bank Harris Nesbitt. Harris Nesbitt's 4th annual conference on the Healthcare industry, held on Wednesday, December 8 at The Millennium Broadway Hotel in New York City, brings together more than 50 leading and emerging companies in the life sciences and medical technology industries.

Inogen CEO Kathy Odell, who will speak at the conference, said, "Inogen has a tremendous opportunity to rapidly gain market share with our innovative single solution for oxygen patients. At the conference, I will convey how Inogen plans to capitalize on the growing, underserved Chronic Obstructive Pulmonary Disease (COPD) market and the clinical shift to long-term oxygen therapy, ambulatory (active) therapy in particular. In addition, I will highlight how Inogen will address both increasing oxygen patient demands and the need of our customers, home healthcare providers, to improve margins after experiencing tremendous financial pressure from reimbursement cuts."

Please contact Inogen for more information.

About Inogen

Santa Barbara, Calif.-based Inogen was founded in 2001 to develop products that improve quality of life while increasing freedom and mobility for respiratory disease sufferers, primarily sufferers of COPD.

Inogen has assembled a team of experienced healthcare entrepreneurs, skilled technologists, well-known clinicians and home healthcare veterans to produce innovative solutions to respiratory healthcare challenges. The Inogen team is passionate about their mission and committed to serving the unique needs of respiratory patients and providers. To learn more about Inogen, please visit www.inogen.net.
